Target Market(s): Behavioral Health Providers, Educators, Researchers

Management

Leadership:
- Richard Cervantes, PhD is founder and CEO of Behavioral Assessment Inc. Dr. Cervantes provides the managerial, financial and operational leadership of the firm. He pioneered the application of statistical analysis and epidemiological techniques to Latino and other multi-ethnic populations in community health environment.
- Has contributed significantly to the development and sophistication of a body of knowledge to address complex health and human services issues using scientific-based solutions.

Dr. Cervantes: President and CEO
Cindy Keig, Chief Strategy Officer
Dennis Beaver, Chief Financial Officer

Scientific Advisory Board: Dennis Fisher, Ph.D., Cal. State University, Long Beach, Daniel Santisteban, Ph.D., University of Miami, School of Nursing, Martha Cristo, Ph.D., Private Consulting, Dharma Cortes, Ph.D., Harvard University, School of Public Health, Amado Padilla, Ph.D., Stanford University

Key Value Drivers

Technology*: The Hispanic Stress Inventory – Adolescent Version is a self report risk assessment form and is the sole mental health risk assessment available for Hispanic adolescents
- Hispanic youth represent the fastest growing segment of the US youth population with unmet health and mental health need. Current population has high rates of dropout, female depression, teen pregnancy and HIV. Health solutions sorely needed.
- The HSIA, the adult version HSI, the Familia Adelante and our referral and placement system will comprise a “package” of tools for the behavioral health professional and other markets in the youth and personal development fields

Competitive Advantage: The HSIA, supported in 2 phase NIMH/SBIR study that included randomized classroom data collection in 4 major US cities to establish normative and clinical scales. Results from over 1,500 youth found 2 separate versions for immigrant and non-immigrant youth. Through the use of HSIA, early screening and detection of youth who are susceptible for drug use, school failure, mental illness and STD/HIV offers cost savings to society vis-à-vis early services referrals for these youth
